

New Patient Qualification, Treatment, and Payment Information

(This is a verbatim transcript of the video on the website.)

(813) 213-1480

Hello everyone, this is Dr. Akoury from Aware Med I am so happy that you are going to join us for an amazing journey at Aware Med. So as soon as you give us a call you will be greeted on the phone by our secretary and she's going to make every effort to answer all your questions, make you feel good, let you know all about what we do, whether you have cancer, whether you have addiction, whether you have chronic disease, we are here for you. She is going to spend all the time listening and make every effort to help you, and she is going to make an appointment for you. From then, as soon as you make an appointment, you're going to come visit us and we'll be more than happy to go over the details of how I can make you feel good. So I want you to look at the office - it's inviting, it's kind, it's loving and you can see warmth and love here at AwareMed, because we're here for you and we do every effort to make you feel good, look good and enjoy healthy life.

As soon as you come to Aware Med and you become a patient, you'll be very kind greeted with warmth and love, and whether you start filling your paperwork at home or at the office, that's a choice you have but we'll send you an email of all the documentations that you may need, so that we speed up your process, because we understand your time is very valuable, and we do everything we can to make sure that we timely get you back in a very comfortable and relaxing position.

So as soon as you decide to become a patient, and after you fill out your paperwork, you go to the triage room. We have a beautiful triage room here, and you can be greeted by a very nice pleasant nurse who really cares, she's a RN and she will take your vitals, blood pressure and monitor, what we call "review of system" to make sure that you do not have any problems. So as soon as that procedure is done, they take it to the next stage and that's the next room, where you spend time with me, so that we can study your story and help you create a roadmap for the future of healing. So we work on restoring spirit mind and body.

So what a pleasure to have you on camera with us and watching us and this is how we greet our patients. So as soon as I see our patient, we are done and we hug them. Every single patient is welcomed and loved at this office, and then we spend a long time discussing the problems that should come in with, we ask a very

detailed history that will help us to make a determination on what is the next step. So is that what you know? [Yes.] And we work together to really become a team and I empower you to become the captain of the ship, and I become one of the coaches. I'm the major coach and every single person that works with us in this team becomes other coaches that will help you with nutrition, with exercise, with meditation and we help you to go from point A to Point B and from point B to point C until you reach your destination. It is so important for us that you reach your destination and your destination is up to your health, beauty and feeling good, energized, happy, so it's my pleasure to work with you to make you feel better, look better, live rigorous and happy. So, whether you have cancer, whether you diabetes, whether you have chronic disease, or whether you want a face lift...we are here for you at Aware Med.

Your second visit with us at Aware Med is to review your lab. Hi Dewayne. [Hi.] Dewayne, we discussed your lab and we see all the problems, all good stuff, and we will go over details and start creating your roadmap for healing, because it is so important because the most important thing for me really is for us to have a roadmap, a GPS to help us get to the next level and now from here were are deciding about you getting your exercise per day, you will go to the exercise room in the back in the few minutes. So food is medicine and that is one of the most important things that I focus on. So we are going to discuss about your food, your nutrition, your exercise, your meditation program and your IV depth program. Based on what you really need, so that's our second visit with you here at Aware Med and we're happy to help.

Hello now again, here at Aware Med, after your second visit then we come up with a plan to get you better and one of the major things for me is to really restore your muscles because your muscles are the power that I have. So mitochondria, the muscles, are your power house of the mitochondria, so I focus on getting your muscles at the mitochondria working perfect so we can rejuvenate you again. One of things that help me do that is to get you on a rigorous and healthy exercise program, and when I get you on a healthy exercise program I begin by massaging the body. Massaging the body will help me drain all the little fat that make your body feel great and rejuvenate and helps me to really start your program. So when people get this, that is step one before we do any ID therapy because I can not treat you unless you are in a receptive healing mode and that really sets the tone for the healing process. But that is one thing that we do here and we will keep you posted with the next step.

And again here at AwareMed, if the plan is to start you on an IV therapy program that is essential for your well-being then we start you with an IV therapy program, but the difference between what we do or anybody else, is we do not have an infusion therapy room with twenty people in one room, so I just keep you by yourself and maybe one or two other patients that may benefit from this, because I really want you to have privacy, I want you to feel good, I want you to feel appreciated, I want to be comfortable, in a very comfortable recliner and be happy. I always ask my patients, not to cross their legs, I said that so many times because that stops the flow of energy and I want you to feel great, I want you to look great and feel good. So if you decide to come to Aware Med, I want you to see the whole journey from the beginning for point A to point B and from point B to point C because I want you to have an amazing experience, I want you to feel good, I want you to improve, it doesn't matter what it is easier, I am here for you and I have an amazing staff that works just for you because we care.

And here is where we were end at AwareMed, and I am so happy that I shared with you our journey at AwareMed, from beginning to end, and it's really never an end because we, once you become a patient, you become family and you're with us for life and we care about you all the time. We never mind giving you our personal phone number if you need to and we're helping you all along the way. Can you put a price for that? Absolutely not because it's priceless to be with you, it's priceless for us to help you and I'm sure that you feel the same way.

Here comes THE question...Does my insurance cover for that? And I am here to tell you we will do everything we can to help you get treated for us by your insurance. We have a very experienced biller that will help us to share all the invoices with your insurance company and we hope that we will do whatever we can to help you get reimbursed. However, we do not guarantee how much is reimbursed. So our clinic is cash-for-service, and our first visit begins at \$499, and really it is a very affordable clinic and we spend so much time with you, and we do the best we can to give you the best treatment possible, and the best roadmap ever, and that's not including your lab, that's not including reoccurring visits, that's not including IV therapy, but we'll do everything we can for you. We love you so much and we're happy to have you here with us at AwareMed and we'll make sure you experience here is memorable and amazing because we care.
